

The Standard Remedy In Countless Homes

Relieves Constipation Easily
Without Gripping or
Discomfort

Indigestion and constipation are two conditions that are closely related and the cause of much physical suffering. The tendency to indulge one's appetite is more or less general and most people suffer at one time or another from indigestion and constipation. A pleasant effective remedy, that will quickly relieve the congestion of poisonous stomach waste and restore regularity, is the compound of simple laxative herbs sold in drug stores for fifty cents a bottle under the name of Dr. Caldwell's Syrup Pepsin. This is a mild, pleasant laxative tonic, free from opiates or narcotic drugs, and has been the standard household remedy in thousands of homes for many years.

Mrs. Oliver Young, Merrill, Wis., writes to Dr. Caldwell, says, she knows of nothing so effective for regulating the stomach and bowels, since taking Dr. Caldwell's Syrup Pepsin she feels ten years younger; her work seems easier and she has regained her appetite.

MRS. OLIVER YOUNG

Get a bottle of Dr. Caldwell's Syrup Pepsin from your druggist and have it in the house. A trial bottle, free of charge, can be obtained by writing to Dr. W. B. Caldwell, 454 Washington St., Monticello, Ill.

TRAINS NOW OPERATE OVER NEW ALIGNMENT

New System Takes Trains Off the
Old Winthrop Cove Trestle.

Both East and West bound trains of the New York, New Haven and Hartford Railroad company now operate over the new alignment from Halam street to the Central Vermont bridge at New London.

This takes the trains off the Winthrop Cove trestle and completes the permanent alignment work at this point until the new bridge across the Thames river is built.

The new Winthrop Cove trestle was constructed in connection with the plans for the approaches to the new bridge. A considerable portion of the new track alignment has been completed for some time and the recent opening of the new Winthrop Cove trestle represents the last step in the realization of the plan to move the river prior to the opening of the new Thames River bridge. The contracts for the construction of the abutments

and piers of this bridge have been signed and work will commence immediately. The total cost of the new bridge and approaches will approximate \$2,500,000.

It is expected that the Thames River bridge will be completed sometime in 1917 or early in 1918. When it is opened benefits will be felt in the more regular and economical operation of trains, and one of the most difficult operating points on the main line of the New Haven system will be eliminated.

Later the company hopes funds will be available that will permit carrying the tracks through the city of New London on an elevated structure and eliminate present congested conditions. When this work can be undertaken will depend entirely upon the general course of business in the United States and whether railways are to be allowed a reasonable return for the services they perform.

Compensation Agreement.

The Shetucket Worsted Co. of Baltic, employees, and Frank Love of High street, Baltic, employee, have reached and filed a compensation agreement with the clerk of the superior court. He was injured on Feb. 11. Compensation was awarded at \$7.44 weekly, to begin Feb. 25.

The New York Flower show has been attended by florists from this section.

SUES FOR \$2,500 DAMAGES

Norwich Woman Brings Civil Action Against Executor of Estate of Charles H. C. Dawley, Deceased—Alleges That Claim Against Estate Was Disallowed and Payment Refused.

Herbert Richardson of Preston, executor of the last will and testament of Charles C. Dawley, late of Preston, has been made the defendant in a civil action brought by Elsie Davis of this city, claiming \$2,500 damages. According to the complaint it is alleged that the plaintiff performed services for Charles H. C. Dawley for a period of four years and the services were reasonably worth \$4 a week, or \$832 for the entire period of 208 weeks, which sum was due the plaintiff from 345 Dawley at the time of his death. During the four years the plaintiff loaned

Mr. Dawley the sum of \$276, which amount was due and is wholly unpaid. On July 2, 1913, Mr. Dawley made and executed his promissory note to the plaintiff for \$900, with interest at 5 per cent. The note is still the property of the plaintiff, is due and wholly unpaid.

On Feb. 10, 1916, the plaintiff presented her claims against the estate to the executor and requested payment.

On March 27, 1916, the executor notified the plaintiff that the claims were disallowed and payment was refused. The writ was returned to the superior court office on Tuesday.

LOCAL BANKER SUPPORTS THE POMERENE BILL

Col. Charles W. Gale Will Attend the Hearing in Washington.

Col. Charles W. Gale, cashier of the Thames National bank, one of the committee of the Connecticut Bankers' association on federal legislation will attend a hearing on the Pomerene bill (the uniform bills of lading act) which passed the senate and is now in the house committee on interstate and foreign commerce.

Col. Gale and other bankers and representatives of commercial organizations will make up a delegation in support of the measure which will be received by President Wilson at 11 a. m. Wednesday, April 12, and after house committee in the afternoon.

Senator Pomerene's bill relates to bills of lading in interstate and foreign commerce to which it was referred after passing the senate. It is understood that the chairman of the committee has been consistently opposed to a statute which would make carriers liable to bona fide holders of bills of lading issued by their authorized agents in case the goods certified as received have not in fact been received. Carriers are not now as liable under the federal decisions and the Pomerene bill would create such liability on bills covering interstate and foreign shipments. Loans by banks on bill of lading drafts amount to billions of dollars yearly and such liability is vital to the security of the supporters of the bill say.

This year the outlook seems favorable for the passage of this bill. The desirability of this legislation has already been presented to the Federal Reserve board under the auspices of the National bank section both at oral hearing and by written memorandum, and the endorsement of the board is hoped for.

GETS MANY INQUIRIES ABOUT STATE PIER

Oregon Concern Wanted to Ship 10,000 Tons of Flour to New London.

Supt. E. J. Guthrie of the Central Vermont railway received many inquiries regarding the use of the New London state terminal pier for shipments during the past few months. The latest inquiry was received a few days ago was regarding a shipment of 10,000 tons of flour.

The flour was to be shipped to New London from Portland Ore., stored at the state pier and exported from there as required. The inquiries came through the representative of a large western grain house but owing to the fact that the pier is not completed the shipment could not be sent.

This is only one of many shipments which have been refused during the past few months since the beginning of work on the pier, and is another indication of the demand for the pier.

C. V. EMPLOYEES PETITION FOR RAISE

Engine House and Repair Shop Men Want Increase of 25 Cents a Day.

Employees of the engine house and repair shops of the Central Vermont railway in East New London have asked the company for a daily increase in wages of 25 cents. The request was made to Supt. E. J. Guthrie who has submitted it to the officials at the company's headquarters in St. Albans, Vt.

The petition was made by about 40 men, including boiler makers, machinists, carpenters, helpers and laborers. A reply is expected within the next day or two and it is expected that it will be favorable. Should it be adverse, some action may be taken immediately, although nothing has been said to the company about a strike.

Superintendent Guthrie denied the report that such a request had been made but employees at the engine house and repair shops admit that they have petitioned for the increase.

Saw New Seagrave Tried Out.

Arthur Buckley, one of the firemen at the Main street station, returned home Monday, after a short stay in New Haven. While in New Haven Mr. Buckley saw the new Seagrave fire department's new Seagrave Aerial ladder tried out. The ladder is 75 feet long and can be thrown in place in less than a minute.

Poultry raisers are finding this a bad, backward season for the hatching of chickens.

HAVE GOOD HEALTH

Take Hood's Sarsaparilla, the Old Reliable Spring Tonic.

Don't let the idea that you may feel better in a day or two prevent you from getting a bottle of Hood's Sarsaparilla today from any drug store and starting at once on the road to health and strength.

When your blood is impure and impoverished it lacks vitality, your digestion is imperfect, your appetite is poor, and all the functions of your body are impaired.

Hood's Sarsaparilla is a wonderful blood tonic. It will build you up quicker than any other medicine. It gives strength to do and power to endure. It is the old standard tried and true all-the-year-round blood purifier and enricher, tonic and appetizer. Nothing else has the same formula or ingredients. Be sure to ask for Hood's; insist on having it.

COUNTY AGENT WARNER'S PROGRAMME FOR WEEK

Expects to Organize a Canning and Sewing Club at Niantic Wednesday.

This week County Agent F. C. Warner is working with State Lender A. J. Brundage and Miss M. E. Sprague, the assistant state leader in an effort to organize a canning and sewing club. Wednesday afternoon he will be at the school in Niantic where an effort will be made to organize a canning club. Thursday and Friday he will be in New London where it is hoped to organize an achievement club. Thursday evening County Agent Warner will be at Long Society club house where a sewing and canning club has been organized with a score of members.

County Agent Warner on Tuesday issued a letter to the members of the New London County league urging the necessity of spraying apple trees, as a means of preventing the ravages of insects who will soon make their appearance on the trees.

For apples, two general sprayings are advised and may be followed by a third if necessary. The first treatment is for the control of San Jose Scale, Oyster Shell Scale, and the like and is made by thoroughly saturating the tree with a solution of one gallon commercial lime-sulphur in 9 gallons of water. This should be applied as soon as possible and should not be attempted after the leaf buds open as the spray will burn the tender leaves and damage the fruit. Sometimes this spraying, if done just as late as is wise, will prevent it will kill the first crop of tent caterpillars but it is not well to delay spraying on this account. The best way to make your trees ready to spray as soon as the leaves appear with lead arsenate 3 pounds, to 50 gallons of water.

The second treatment is for the control of codling moth and fungus troubles such as scab, sooty blotch, specks, rots, etc., and is made just as late as is wise. It is made by spraying with a solution of Bordeaux and arsenate of lead. If you have much spraying to do it will pay you to make your own Bordeaux from 1 pound copper sulphate and 4 pounds lime to 50 gallons water. Dissolve the copper sulphate in a coarse sieve suspended in the water. Make the lime separately. Dilute each to about 50 gallons. Strain the lime into the spray barrel, then add the copper sulphate solution and mix well to make fifty gallons. Now dissolve 3 pounds paste lead arsenate (or 1 1/2 pounds of the powder form), and the spray will be ready to apply. If only a small orchard is to be sprayed, use some brand of ready mixed Bordeaux and apply at the same rate as above. If fungus troubles are bad it may be well to repeat the second spraying in three or four weeks.

The latest bulletin of information issued by the New London County Farm Bureau, the Connecticut Agricultural college and the United States Department of Agriculture, cooperative, has just made its appearance. Speaking of the farm league the Bulletin says:

When the average farmer in New London county cannot raise money at a bank on property that is valuable when he cannot raise crops which will return him a profit, when he cannot sell his crops, his milk, his hogs, at a price which will pay the cost and allow him a profit on his labor and management, there is work to do. The New London County Farm Bureau was organized to meet this need. Its purpose is to develop the agricultural resources of the county, to help make farming more profitable life on the farm more enjoyable and the communities better places in which to live. Because of the interdependence of the country, town and city, this will be done by the best means available and improve conditions in the cities.

The annual report of the County Agent covering the second year's work shows that a business analysis of seventy farms was made in an effort to aid the farmer in managing his business to greater profits. Several Royal "Birds" Circle Agricultural Extension agents during the summer the children being taught to raise and care for garden crops, to store away for the winter such products as canned fruit, to care for poultry and calves, and to help clothe themselves by learning to sew. New London County Boys and Girls captured several state prizes for the best work in these lines.

Nineteen carloads of fertilizer and lime were secured at a considerable saving, thereby giving the farmers a chance to improve their soil. The county agent during the summer the county agent secured canning demonstrations for seventeen communities. Exhibits were made at five fairs and corn growers got together at a special corn fair which brought out some of the best corn in the state.

A farmers' exchange was maintained and the culture for inoculating alfalfa seed, bulletins, dairy record sheets, and information of all kinds was secured for those requesting the same. Six hundred and twenty-one farmers were visited on their farms, 1047 personal letters and 3009 circular letters were sent out from the office, 256 people called at the office for information and the county agent was reached by phone 359 times. One hundred and one meetings with an attendance of 7,200 people, were addressed by the agent.

The county agent is not expected to know everything, off-hand, but he can secure any information needed from the State College, the State Experimental Station, or the United States Department of Agriculture. He teaches men how to produce better crops by using better seed, by pruning and spraying, by keeping records, how to keep the fertility of the soil by fertilization, cultivation and crop rotation and how to market, by standardizing, grading, and selling cooperatively in addition he teaches the principals of cooperation—cooperation of farmer with farmer, neighbor with neighbor and of farmer with business man.

The man of the future must have social vision, must realize that he is

LATELY ARRIVED More of the Prettiest Wash Goods

The first we received we thought were as pretty as could be, but the newer ones are proving to be even prettier and more attractive. They are sheer and dainty, the colorings are charming, and the designs are really beautiful. A comparatively small investment at our Wash Goods Department will secure for you Summer frocks of real beauty and distinction.

EMBROIDERED VOILE—29c a Yard

This is an unusually low price for Voile of this character. It is a white Voile, very sheer, and is decorated with embroidered designs in single and double colorings. You will rarely find such quality at such a low price.

BOURETTE SEED STRIPE VOILE—33c a Yard

This is a 38-inch fabric, the ground work being a fine quality Seed Voile with colored Military and Novelty Stripes. It is an altogether attractive fabric and follows the lines of the most desirable of the striped weaves.

NOVELTY SEED STRIPE VOILE—33c a Yard

This pretty Voile with its uneven white or tinted ground is ornamented with self-colored seed stripes and printed with floral designs in charming colors. It is a yard wide and very pretty.

"BEAUTY" SATIN STRIPE VOILE—39c a Yard

This has just arrived and isn't going to stay long for it is too dainty to be passed by. Fine and sheer, with white or tinted ground and satin stripes of the same color. Some of it is prettily printed in contrasting colors.

"MEADOW BROOK" SILK STRIPE VOILE—75c a Yd.

One of the most distinctively beautiful fabrics we have seen this season. The colorings are very rich, including Rose Pink, Belgian Blue, Battleship Grey, Etc., also plain white, the silk stripe being self colored.

COLORED DRESS LINENS—69c and 79c a Yard

We were fortunate in getting our complete order filled, and would suggest an early selection while the assortment is intact, for the securing of more is a problem. There are two widths, 36 and 45 inches, and we have both these widths in all colorings.

COLORED HANDKERCHIEF LINEN

For Separate Waists 69c a Yard

The Reid & Hughes Co

a man living in a community with other men, must work together with those other men in pursuit of their common interests.

The success of the work depends on the active members. The farmers belonging to the bureau are the agent's best helpers. With his help and suggestions they put into practice on their own farms what is best along any line. The results they secure may be used as demonstrations for others in the community. They as well as the agent are teachers and are not only helping themselves but others as well. The best work of members is not and cannot be a selfish or self-seeking work; while some may ask, "What do I get for my dollar?" more will inquire, "What can I do to help?" Our work is for the community, for the town, for the county. Each farmer who becomes a better farmer because of league membership will profit himself, it is true, but the larger profit goes to his neighbor on account of the example of improvement. Cooperation being so big a thing, there cannot be too many doing it. Get together for the big job.

CONNECTICUT RANKED SECOND.

According to word received Tuesday by Dr. S. J. Maher of New Haven, chairman of the state tuberculosis commission, Connecticut ranked second per capita of all the United States in the campaign sale of Red Cross stamps from Nov. 25 to Dec. 31, 1915, with a total of 2,542,774 stamps sold at a sum of \$25,657.74. The result was announced by C. M. DeForest of New York, sales manager of the Red Cross stamps. Of the sum received, 19 per cent will go to the national association and the remainder will be applied to tuberculosis work in the towns in which the sales were made.

Enjoyed Performance in Theatre.

On Monday evening the Junior class and Tuesday evening the Intermediate class of the Backus Hospital Training school, following their quarterly examinations were given an evening's pleasure at the Davis theatre by a gentleman who is much interested in the hospital and school.

You Don't Need a Coal Fire To Get Plenty of Hot Water

Stop making an oven of your kitchen—you'll be hot enough without it. Stop all the unnecessary labor of starting a coal fire and removing ashes. Stop heating water in pots and kettles on your gas range—you are wasting gas. Stop all this old-fashioned drudgery in your kitchen. A

"Vulcan" Gas Water Heater

will give you all the hot water you need so easily, quickly and cheaply that you will wonder how you ever got along without it. Ready any time—day or night. Just strike a match—turn on the gas and in a few minutes you have steaming hot water in unlimited quantities. And your kitchen is cool because the heat goes into the water and not into your room.

The small amount of gas these heaters burn will surprise you. The low prices and reasonable terms place them within reach of all.
